Honda and Acura Officially Approve Pro-Cut

West Lebanon, NH

After many months of testing, the Pro-Cut lathe was approved for warranty and customer pay brake service in all Honda and Acura shops in the USA. The testing period included the design of three custom, nickel-plated adapters made to Honda/Acura's refinishing requirements. These adapters each have a center bore that nests perfectly over the Honda/Acura hub, insuring a perfectly centered adapter. The three-piece adapter package is required for servicing.

ACURA

"We are very pleased to be approved at Honda for warranty work. Although we have been in the majority of their shops for a long time, it is only until recently that Pro-Cut has been approved for warranty work. We are very excited for this opportunity," said Bruce Prince, VP Sales.

Working closely with Honda, Pro-Cut designed and manufactured custom-made adapters as part of the new Honda/Acura lathe package.

PRO-CUT INTERNATIONAL is the world leader in rotor matching systems and on-car brake lathes. The company is located in West Lebanon, NH.
